

• 00.30X.XX FASTCOUNT SP RF PRODUCTSHEET EN •

INTRODUCTION

The Fastcount SP is a **wireless** counting system that is read out manually from the display. The standard system contains two standard sensors for horizontal measuring and is very easy to install.

With the optional antenna and a central unit the Fastcount SP is PC connected. The complete system has automatic data retrieval; counting data is accurate and precise. Reading via LAN, GSM or Serial and linking to your BW, DW, POS or ERP system is possible.

USAGE

The Fastcount SP is specially designed for monitoring events. Further more this system allows you to:

- Determining average conversion ratio per week or per day;
(The ratio between visitors and buyers)
- Prevent data loss with a built-in fraud detection;
- Determining of best opening hours;
- Measuring promotion/marketing activities (ROI).
- Determining frequency and peaks;
- Effective personal planning

OPTIONAL

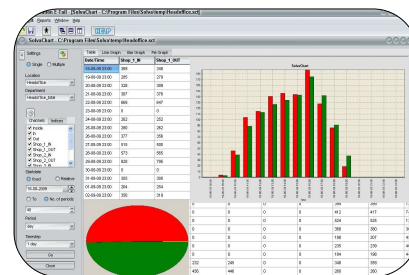

The Fastcount SP has two different types of RF sensors. Depending on the situation will be measured, choose Front Firing or Side Firing sensors. The Fastcount SP RF sensors are available in the standard colors black or gray. Other RAL colors are available on request. If you want to measure outside, choose a special outside housing.

SPECIFICATIONS FASTCOUNT SP RF HORIZONTAL SENSORS

- Integrated 6-digit LCD counter
- Transmission range: 9 m IR
- Battery life: up to 2.5 years (user replaceable)
- Transmission range: 180 meters max RF
- Dimensions: 78mm x 50mm x 28mm housing ABS

SPECIFICATIONS CENTRAL UNIT

- Number of sensors to a central unit: up to 100 pieces
- Ethernet: 10 Mbit / s
- Power: 6 volts to 12 volts DC 600 milliamps
- Dimensions: 85mm x 108mm x 35mm housing ABS
- Optional: 2.4 GHz Receiver / Transmitter repeater serving / vertical sensor

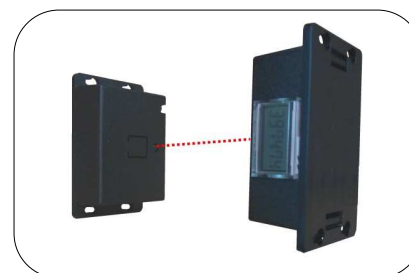

Automatic Dataretrieval

Complete set

Side Firing sensorset

Front Firing sensorset

Case for outside mounting
